

## HUMAN TOUCH HOME CARE, LTD.

### EXPERTS IN LIVE-IN CARE

HUMAN TOUCH HOME CARE, LTD. has over eight years of experience referring carefully screened and very dedicated live-in (round-the clock) Caregivers to our clients. The demand for these wonderful Caregivers has increased as more seniors remain in their own homes and 'age in place' in the comfort and security of familiar surroundings. As difficult as it may be for you or your loved one to make the decision to have live-in care, it is a very affordable way to provide round-the-clock coverage for those who should not be alone. HTHC, LTD. can set up live-in care so that you or your loved ones enjoy continuity of care with usually just two individuals covering every day-one during the week and another on the weekends. To make the live-in arrangement as comfortable as possible for you, expect your Caregiver to accommodate your schedule so that you can stick to your routine as much as possible. If you are used to being up early and having breakfast at a certain hour, expect your Caregiver to adjust her schedule so that she is up and dressed and ready to attend to your needs at your preferred time. The same thing applies at bedtime. You should expect your Caregiver to help you get ready for bed at your chosen time, and stay up to assist you until then. Expect your Caregiver to attend to your needs during the day, and to get up with you to assist you at night, if you only need help once or twice during the night, for short periods of time. In addition, the live-in Caregiver will perform a wide variety of simple household tasks for you, such as making beds, doing laundry, purchasing and putting away groceries, feeding pets, preparing meals, washing dishes, and of course, assisting you with your non-medical personal care needs. In order for a live-in arrangement to be successful, it is best to have a spare bedroom or a den which you can convert to a bedroom so your Caregiver has privacy. Having a live-in Caregiver enables family members who work full-time to pursue their careers knowing their loved one is safe and well cared for.

**LIVE-IN RATE \$143 per day**
